MANUFACTURING PROCESS

SEA WATER

We collect sea water in the straight between Bali and Lombok islands, at a depth of 45 to 50m. This water is known for its continuous circulation at great depths, moving between the South and North Poles. It remains perpetually fresh and is a source of endless natural diversity. The water also measures an exceptional vibration rate of 900,000 on the Bovis scale.

ORMUS CRYTAL PRODUCTION

Our ORMUS is produced with joy and alchemical love using a safe, precise, and potent method. Several techniques and technologies are employed throughout this unique process to enhance its vibration rate, including:

- Specific electro-magnetic fields and frequencies
- Highly energetic pyramids and telluric points
- Crystals, Gans and other alchemical substances

Our ORMUS crystal is cleaned and dried with the utmost care.

HOW DO I USE MY SELOR ?

The ORMUS crystal is in a dormant state, awaiting activation in the presence of water, transforming into plasma - the fourth state of matter. It has a wide range of potential applications, but let's focus on its use for humans. There are primarily two ways to absorb it:

- Diluted in neutral drinking water
- Diluted directly into the body's water

ORMUS DRINKING WATER

Use drinking water that is as neutral as possible, with a pH of 7 or higher, a TDS preferably under 100 ppm, and a clean, unleaded glass bottle. The recommended mixing ratio is 4g of SELOR per 1 liter of water. **Intention is key** during this process. As you dissolve the ORMUS crystals into the water, it will absorb the energy and information you intend to infuse - ensure that this intention is clear and comes from the heart. Allow the mixture to rest for 24 hours before drinking your self-made "holy water".

Before reaching the bottom of the bottle, where some crystals remain visible, refill it with water while maintaining the same intentional focus. Your bottle can last for months and may be stored in the refrigerator.

HOW DO I USE MY SELOR ?

STRAIGHT CONSUMPTION

Recommended dosage per intake / per day: 2 to 50mg of ORMUS crystal.

Simply swallow with a glass of your favorite water.

Start slowly and gradually, adjusting quantities to your own needs. The unique property of this crystal is that it responds only to positive intentions.

PRECAUTIONS

- Store your SELOR in a high-vibration environment at ambient temperature
- Avoid touching it - handle only with the palm of your hand before intake
- Use a clean plastic or wooden spoon to transfer it - no contact with metal
- Always handle with a mindset of clarity, positivity, and spiritual awareness
- Whether you are a believer or not, remember that you are interacting with a divine intelligence connected to the Source of Life

Note:

The mini plastic spoon supplied can carry up to 30mg of SELOR

BIOENERGETIC PROPERTIES

Fenyx reports have shown remarkable stability throughout the process, although the measurable parameters have now reached saturation (0% or 100%, as indicated in the recent report). This confirms that the ORMUS crystal is in a latent stage, awaiting activation within the living system. It has been proven that once mixed with water, its bioenergetic properties will shift, adapting to reflect its personalized physical, energetic, and spiritual environment. This superconductor substance is highly receptive.

As of today, our SELOR is delivered with vibration rates ranging from 3.2 to 3.8 million on the Bovis scale, aligning with the current Earth vibration rate. This rate can easily be adjusted - either lowered or enhanced - by each individual user.

SELOR is an outstanding, malleable, and powerful universal substrate for each of us!
